

Introduction of PICO Business Suite

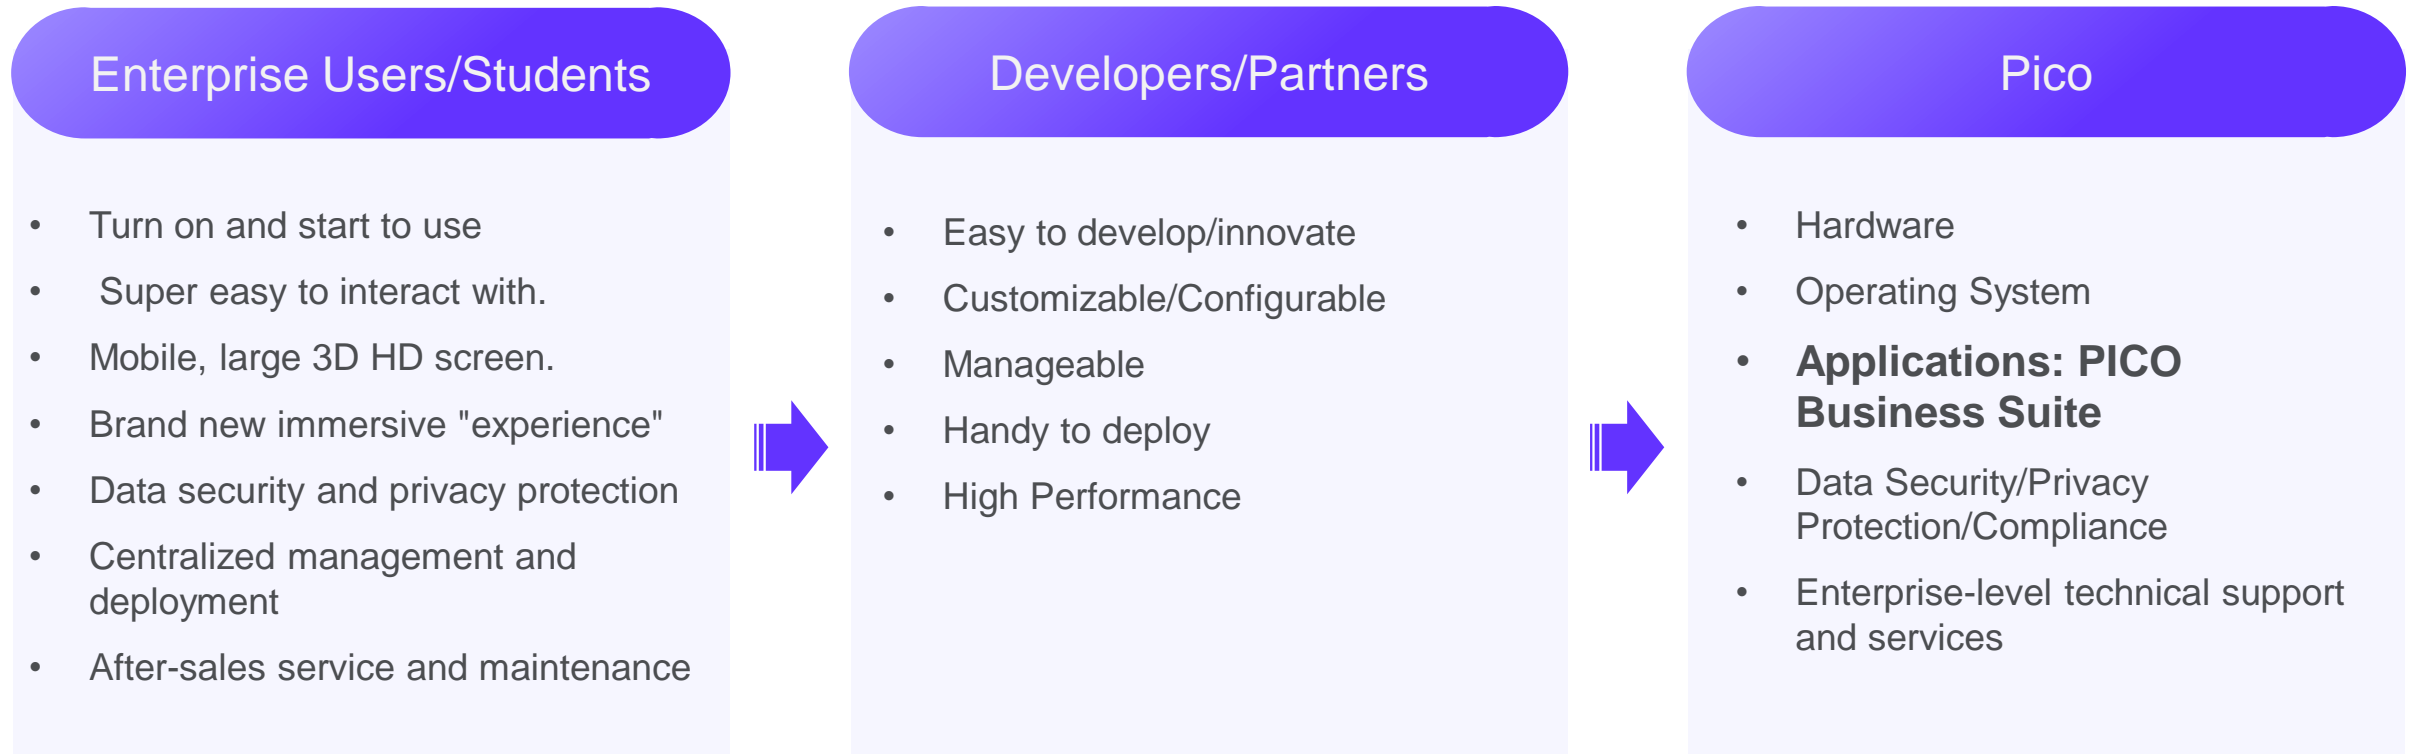

September 2022

Pico Business

Always focused on the needs of enterprise users. Think in the shoes of developers and partners.

Pico built a brand new experience, including Business Suite, to enable enterprise users and developers.

PICO Business Suite

Business Suite is a software developed by Pico to address the needs of enterprise clients for customized solutions. It includes three main functions: Sync, Streaming and Kiosk Mode.

Sync :

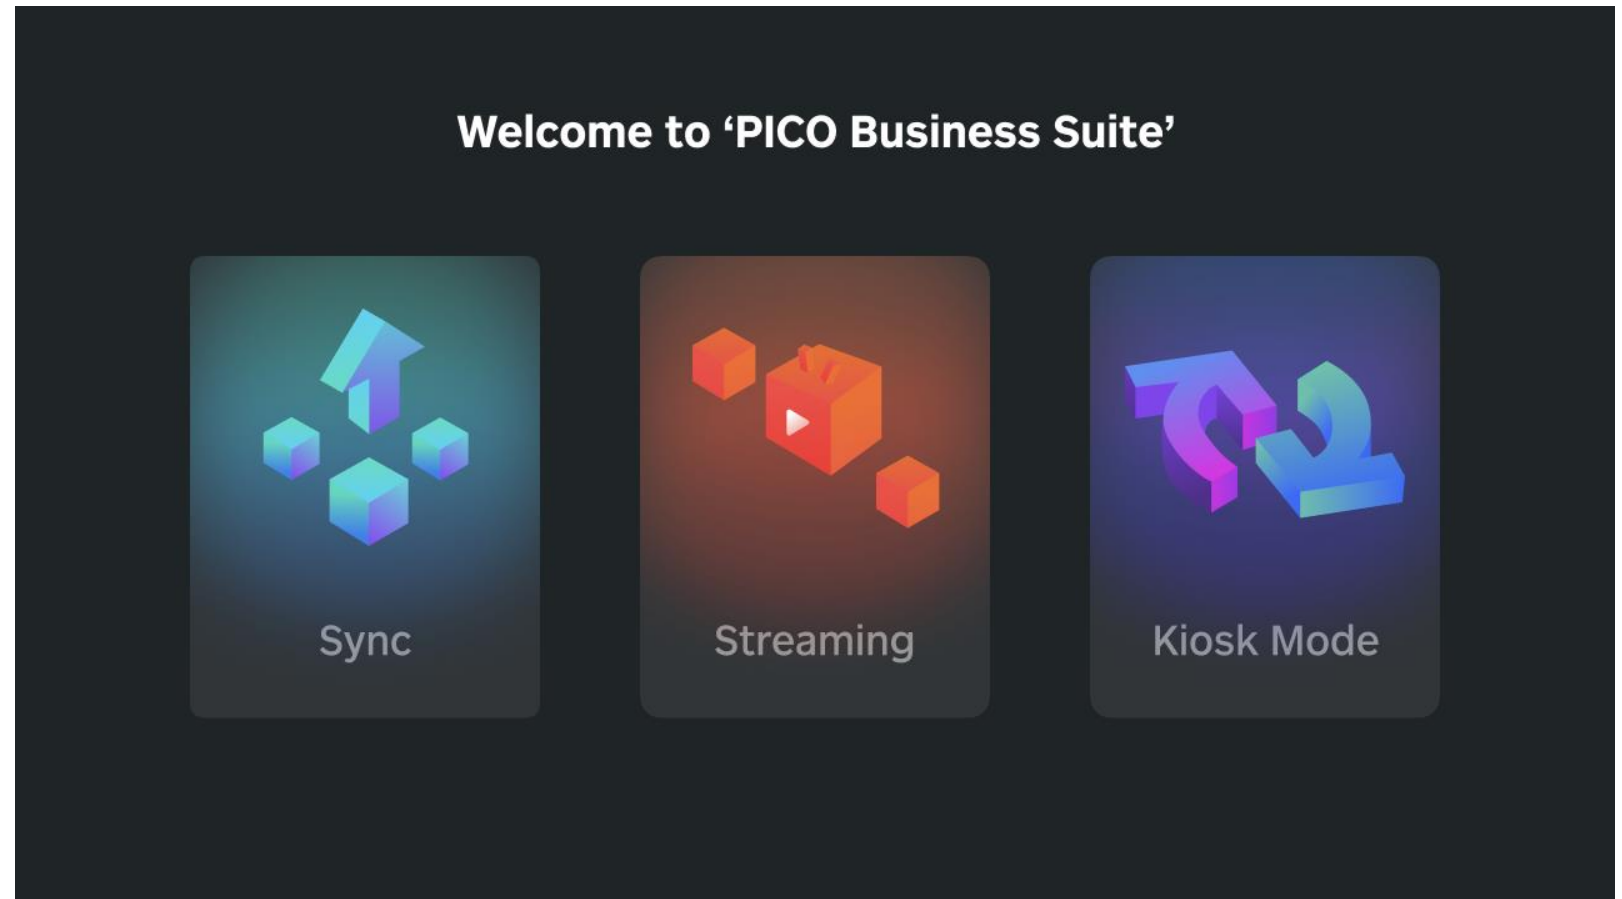

Users can control multiple VR devices to experience videos, panoramas and applications simultaneously.

Streaming :

Directly transfer other VR headsets for playback via live stream address or video stream from steam VR

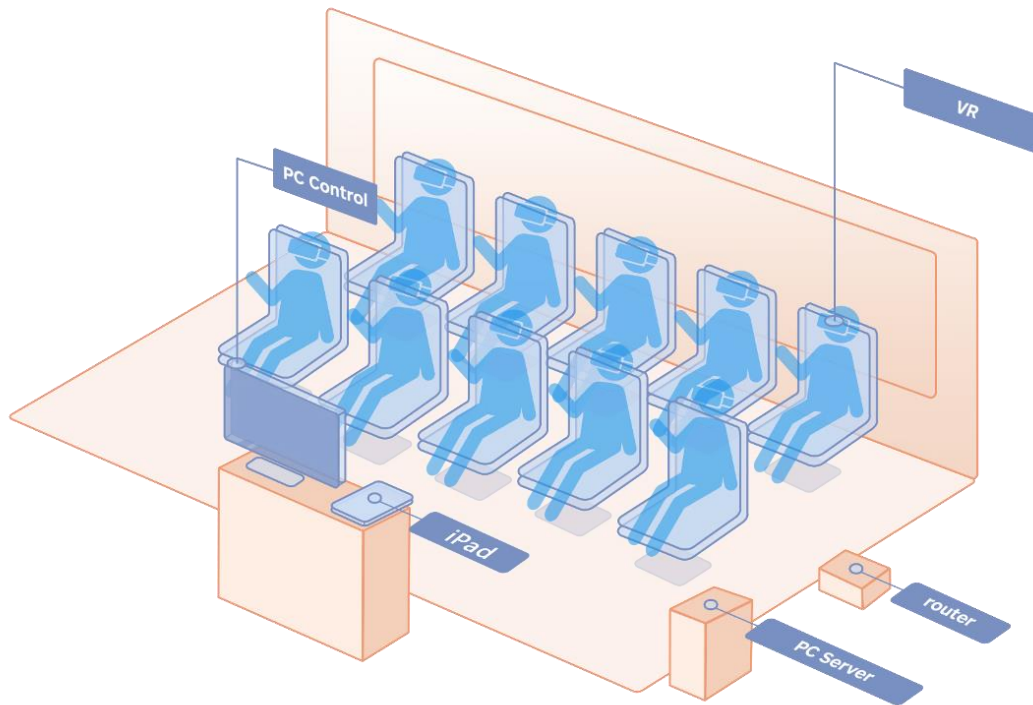

Kiosk Mode :

A solution that allows users to experience VR video quickly and easily while unattended

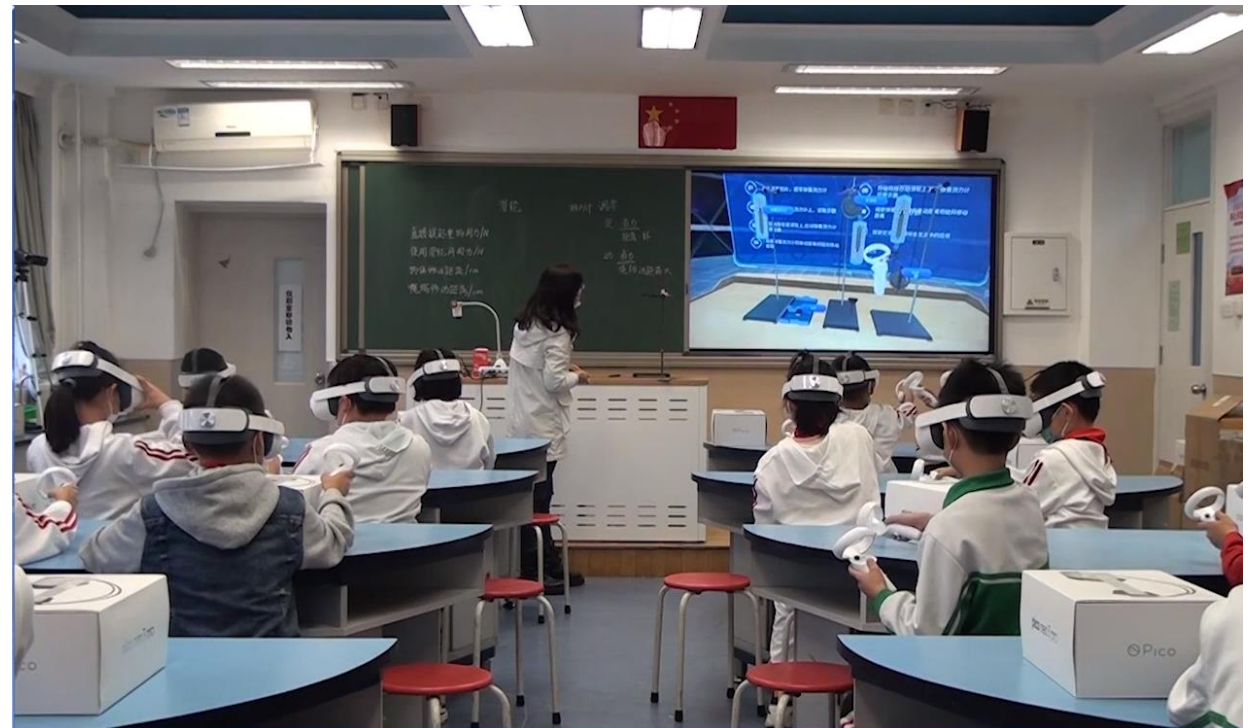

Sync

Users can use Sync function to control on one computer and connect multiple VR devices as experience terminals through one router. Suitable for training and education scenarios.

Sync

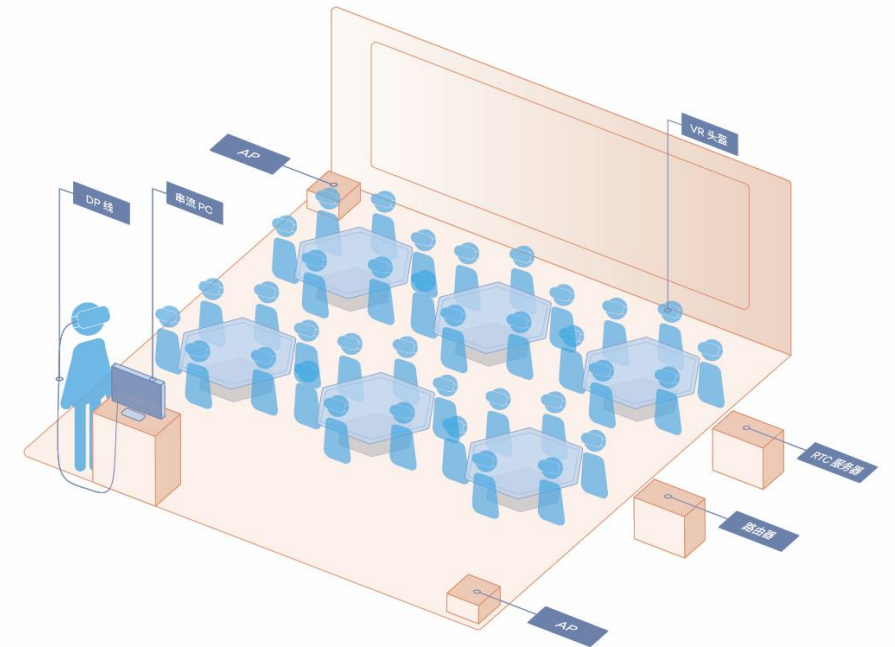

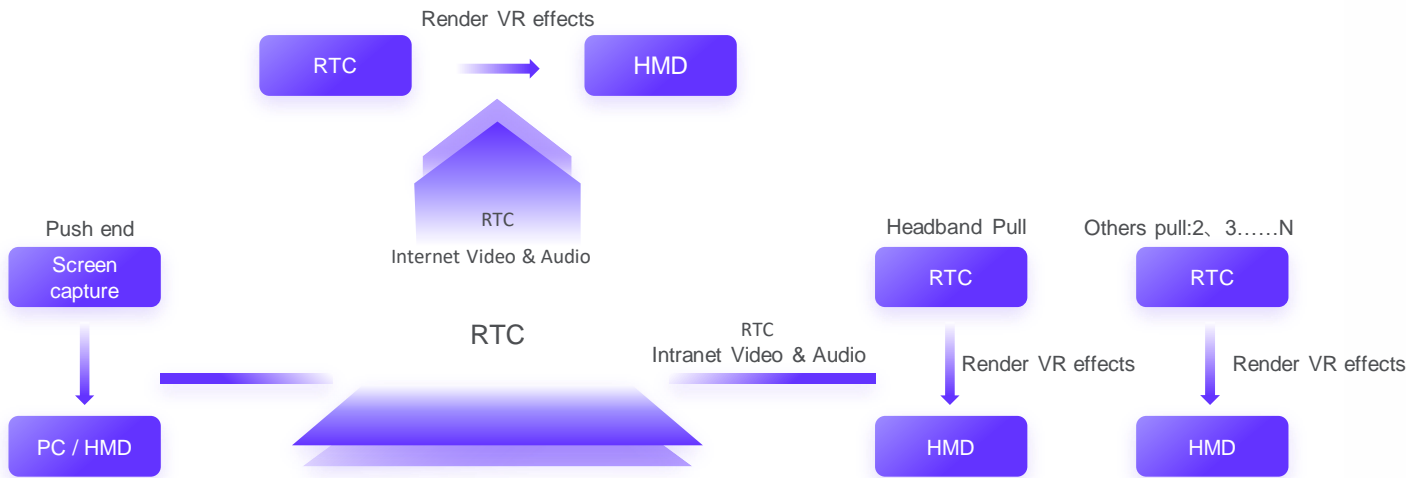

VR Classroom

Streaming

The PC runs VR HD content that is pushed to multiple headsets by live streaming. **Teachers can demonstrate content on PC VR, and students can follow the teacher's perspective in real time to learn.**

The solution has advantages including low cost, easy content transformation and simple maintenance, which will provide great help to the education and training market.

Deployed in LAN supportive
4K 40M bit rate highest

Pushing delay ~100ms
Proved Smoothness at a bit error rate of 50%

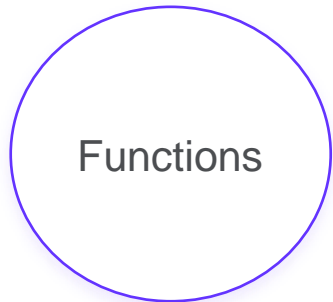

Max 30 persons in LAN*
Max 2000 persons In Internet

* Related to internet deployment

Kiosk Mode

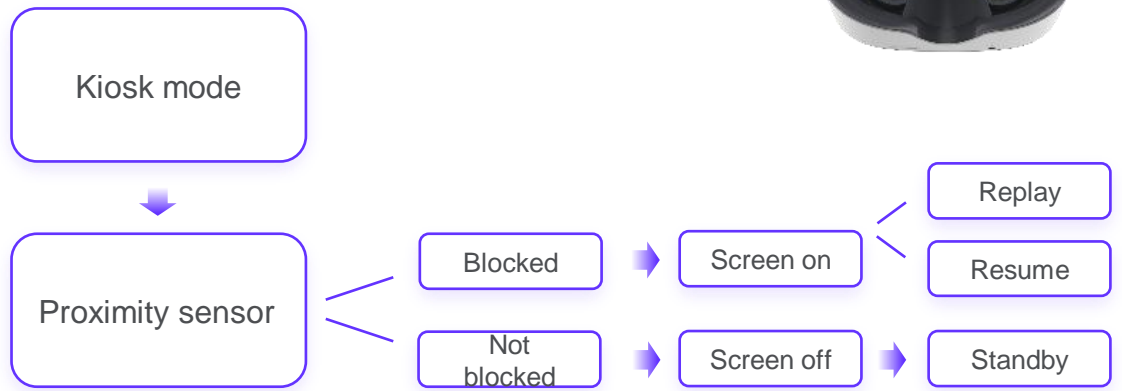

The Kiosk Mode is Pico's solution for users to experience VR videos quickly and conveniently under unattended conditions. Users can simply put on the all-in-one headsets and watch one or more customized videos automatically.

Play videos automatically:

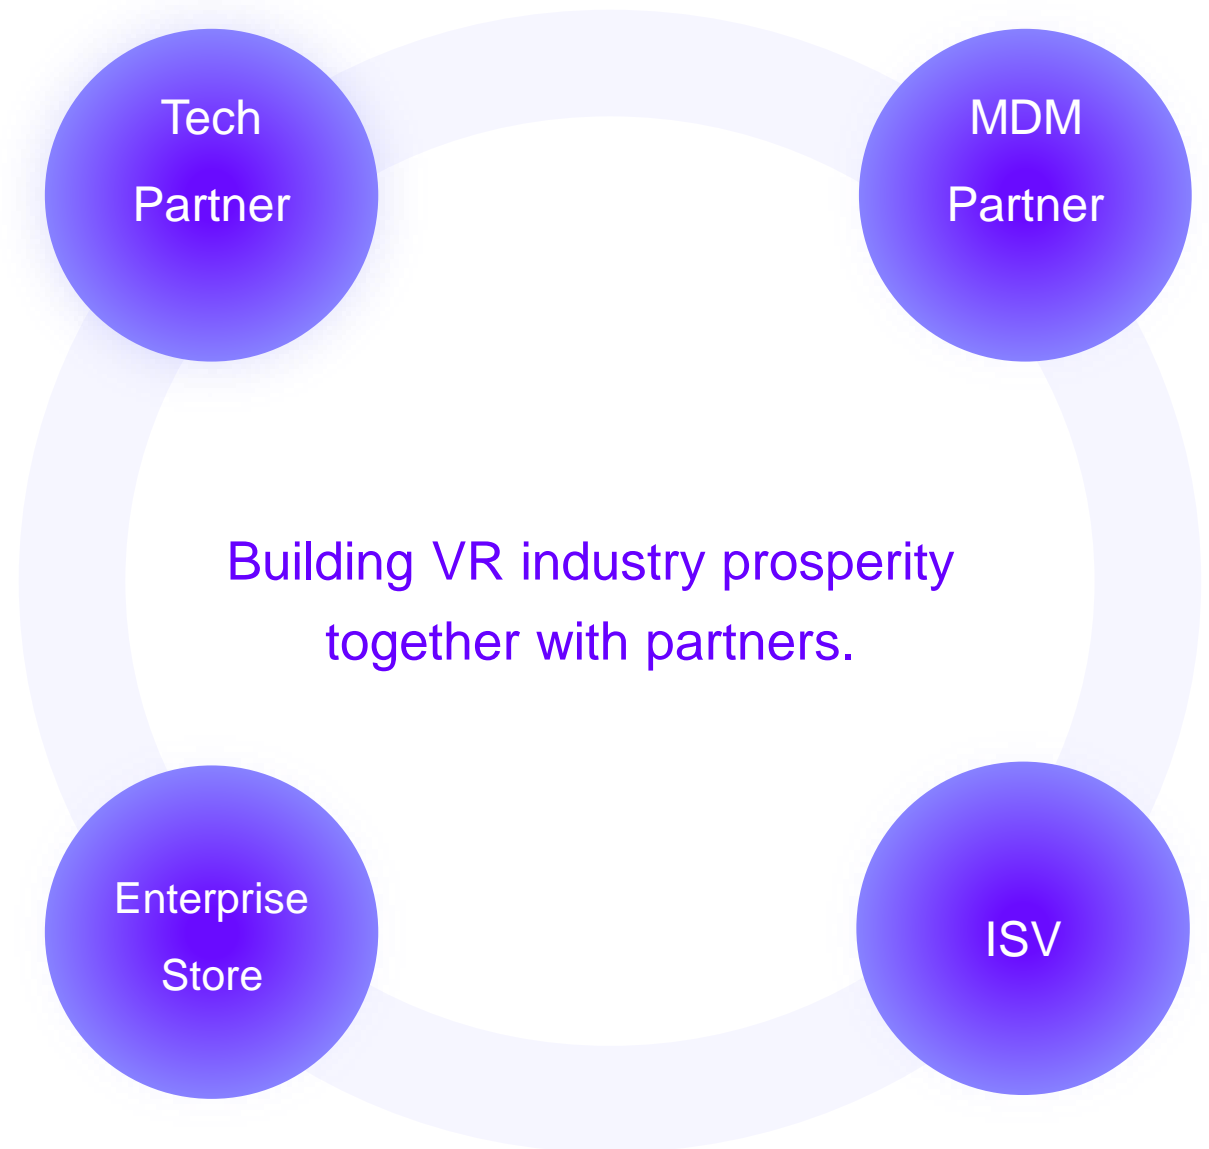

- Add videos
- Set the playback order
- Set the playback order (replay; resume)
- Set the playback mode (360、2D、3D)
- Set the playback mode (SD、 U disk)

Proximity sensor

Pico Business Ecosystem

Build a world's leading XR platform to help developers & creators succeed and bring a world of mixed reality within reach.
